

I listen to 104.3FM here in Cincinnati. It is KLOVE radio. This radio station is imperative to my daily work and helps keep me informed on key issues. This radio station has helped me grow in my life and allowed me to grow closer to God. If this station were taken off the air it would be a detriment to many people around the country everyday for encouragement and positive music. This radio station allows people to calm down and also become a better person. It is a great station that helps people to understand where they come from and would hurt the local area by creating a void of music and help that is offered 24 hours a day by the station. They have people there at all times of the day to speak with anyone about anything. That is more valuable than any social program because it helps people find and meet their needs.
